

# TB Testing Locations

San Diego Unified School District no longer provides tuberculosis (TB) testing for parent volunteers. Tuberculosis clearance is mandatory for school volunteers and you cannot begin volunteering until clearance is completed. If you are a current or a new volunteer that needs TB testing, you may obtain TB clearance from a private physician, at your own expense.

Please note that you must have your TB test completed within 60 days of a completed Dingeman volunteer application. TB tests are only needed every four years.
